Profile Picture

2012-2016
Post-Graduated**Majoring in International Economics** Foreign Trade University
Current GPA: 2.8/4, 7.5/10
Relevant coursework:Logistics and International Transportation, Micro and Macroeconomics, Principles of Finance, Principles of Accounting, International Economics, Human Resources Management, Econometrics..

2014-Now
Online Course **Majoring in Data Science** IBM-MIT-Harvard-NYU
Certificated: Micro-credits
Relevant coursework: CS50AI, Bayesian in Python, 6.431x:Probability and Discreet Math, Stanford ENGR108: Applied Linear Algebra, CS224W: Machine Learning with Graphs, Deep Learning/Pytorch-NYU, StanfordOnline SOE.YCSCS1: Compiler, Statistical Mechanics

WORKING EXPERIENCE

ON CAMPUS

2013 - 2014 **Foreign Trade University** Member of Human Resources Department, Business and English Club

- Technical core team for TEDx Dien Bien Phu Street event – 2014
- Designing, printing and delivering conference's materials (back-drop, standee)

OFF CAMPUS

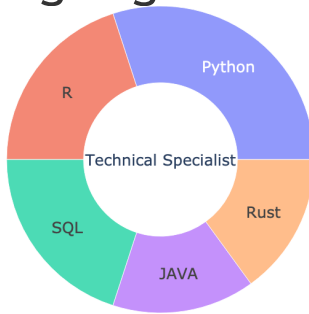

10/2025 - Now**VORTEX DATA COMPANY LIMITED** Full-time AI Engineer

- Building Customer Churn, Customer Lifetime Value, Next Best Action, using A/B Testing, Experimental Design và Statistical Significance assessment , (Diff-in-Diff, RDD, Instrumental Variables)
- Developing JEPA energy deep learning backbone.

05/22 - 10/25**Kasatria** Full-time AI Engineer

- Thanks to Mr.SonTruyen, migration GA3 hit type to GA4 event type in GTM, automate GTM and GA4 360. Building OneTap, Consent-Mode on client-side and prepare for server-side cookieless tracking.(Cloud Storage, Cloud Function, Cloud Run, GKE, Dataform, Bigframes, ADK-MCP-A2A protocol)
- Obtain Google Cloud Engineering <Certificate> and ML Engineer <Certificate.>
- I could do LTVs and recommendation AI, Meridian (Bayes setup) in Big Query project.
- Join the open source research for LLM Speech2Text <Espnet>
- Make a reproducible <Wav2Vec2 Finetune> for speech emotion detection and <VAE-LSTM> for anomaly detection in time series in real time manner.

Languages

- Thanks to PhD.Liem and Mr.Phuong instructions, we could apply many Deep Learning in solving detecting labelled images in Team-work Project of Mask detection(using git, organizing Un-Supervised Classification on variety of dataset, running YOLOv3).
- Dockerize my own product pipeline api to face detection and verification running on gpu/cpu, using embedding arcface. FireSmoke detection using Tensorflow Object Detection API. [<document>](#)
- Build Visualization platform concept and document how to use and ETL from MySQL ,PostgreSQL to Metabase, Tableau, and ATLAS (open-source for CDM). [<document Metabase>](#) [<OHDSI>](#)

07/18 - 09/19 **GONJOY**

Full-time Data Analysis

- Thanks to start-up team, I could apply my R and Python skills into work with raw data from SQL using SQLAlchemy and build the way to get advantages of NoSQL a.k.a ,MongoDB, Neo4j, ELK, Cassandra to Kafka. [<document NoSQL here>](#)
- Using multiple analysis methods: Eclat, Sankey chart, Nguyen Tuan, making weekly, monthly pdf reports, and set KPIs. Running ML models: xgboost, RDF to classify User Behaviour.

10/17 - 07/18 **NIELSEN**

Full-time Output Operator

- Thanks to the supervision of Head Mr.Son and Manager Mr.Nhat I could approach many new initiatives to build better process for the whole team.
- Automate reports and help other teams to complete their task more quickly by using VBA, GGSspreadsheet and Excess design.

06 - 09/2017 **VNG**

Full-time Marketing Fresher Fast Track

- Doing Data Analysis along side with Mr. Long (Marketing Head) and Mr. Trong (Dept. Head)
- Working on the concept of ARM model (Attribution-Retention-Monetization) to improve DAU.
- Trying to apply Holt's method model and EOQ model to predict Retention and Churn rate.
- Mining big data from more than 20 columns x 4 million rows of data using R.

EXTRACURRICULAR ACTIVITIES

2014 - 2016 **Summer and Spring Voluntary Campaign** Ben Tre; Ta Lai; Cu Chi, Binh Phuoc

- Building "Tinh Nguyen Tre" fanpage on Facebook.
- In charge of leader for Autumn festival performance and logistics.
- Learning points: loving and caring, emotional connection, planning and organizing, working under pressure, high emotional intelligence.

2020 - Now **Personal Project**

- Wandering Lifestyle Podcast [<link>](#) :
- A webservice with Reactjs, login, supabase, redis [<link>](#)
